**MESSAGE**

I hereby congratulate India SME Forum for bringing recognition to the MSME Sector as growth drivers of the economy. It is high time that we appreciate and felicitate their efforts in India's growth. I take this opportunity to wish all the winners and this should be a source of encouragement to the others.

I am sure that this will change entrepreneurial landscape in India and create an environment that inspires Startups, Small & Medium Business and aids economic growth.

On this Occasion I wish India SME Forum and their members all the best and success in the Years to come.

- Recipient of 2011 Best Industry in District Award by Government of India
- Achieved "MSME1" highest level of financial rating by SMERA in 2011, 2012 and 2013.

### Company

HD Fire Protect Pvt. Ltd. is a leading manufacturer of comprehensive range of world-class water and foam based fire protection equipment. As fire protection is more of a passion than business at HD, they constantly try to excel by focusing on quality, innovation and customer satisfaction. This has attracted a remarkable portfolio of committed clients in more than 50 countries across the globe.

For over 24 years, HD products have been tried, tested and successfully accepted worldwide. They have been involved in meeting ever-changing and demanding industry standards, providing a wide range of product line ranging from simple industrial fire suppression to the most complex offshore fire fighting systems. At HD, their goal is to offer their customers fire fighting solutions that meet all requirements and complexities. Therefore, they manufacture an extensive range of products, including standard as well as special tailor made systems.

HD production processes are unique combinations of onsite foundry, CNC machine shop, advanced fabrication techniques, modern paint shop and exhaustive test facilities backed by dedicated and experienced design and development engineers. Their quality system is ISO 9001:2008 certified, while most of the products are UL Listed, FM Approved or approved by Indian Bureau of Standards. The organizational philosophy for continuous enhancement in design, manufacturing, testing and customer service has made the HD brand synonymous with Excellence, Reliability, & Trust.

The company regularly organizes training programs at their facility, as well as on site, covering various areas such as Product Installation Training, Deluge and Water Spray Systems Training, Bladder Tank and Foam system Installation and commissioning and any other specific training as per requirement.

HD's technological information is integrated to establish the product development roadmap. Their integrated production system leads from materials to finished products, allowing accumulation of technological elements such as materials, processing, design, and production technology, as well as supporting software, analysis and evaluation. In their integrated production system, all technical elements are sequenced and mutually connected with each other.

With rapid industrialization and escalating governmental regulations, the fire safety equipment market in India is poised for rapid growth. Entry of multinational companies in India will be the key driver as the fire equipment companies force their suppliers and partners to work with stricter safety regulations. Also, increasing awareness and willingness among the large domestic players will also provide a thrust to safety equipment segments. Industries are increasingly focusing on safety and are buying quality safety equipment. Corporates have started laying emphasis on understanding the difference between price and quality.

HD is committed to innovating and refining our processes in order to design and manufacture the best products in the industry. HD has a global reputation for excellence in product design, quality, reliability and the highest levels of customer service makes them the ideal partner for the supply of fire protection equipment & systems.
