

PORTABLE INLINE INDUCTOR

MODEL - IE225 AND IE450

TECHNICAL DATA :

MODEL	Refer Table - I
SIZE	65 NB (2.5")
WORKING PRESSURE	7 or 12.3 kg/sq.cm (100 to 175 psi)
CONNECTION	2½ inch Male Instantaneous Coupling at Inlet 2½ inch Female Instantaneous Coupling at Outlet (As per BS:336 and IS:903)
MATERIAL	Standard supply: Stainless Steel 304 (CF8) Optional supply: Stainless Steel 316 (CF8M) or Bronze. Pickup Tube is Stainless Steel
FINISH	Yellow finish
WEIGHT	9 kg
APPROVAL	As per Table - II
ORDERING INFORMATION	Specify Model & Inlet Pressure

TABLE - I

MODEL	MATERIAL OF CONSTRUCTION
IE225-7B	Bronze
IE225-7S	Stainless Steel CF8/CF8M/CF8L
IE225-12B	Bronze
IE225-12S	Stainless Steel CF8/CF8M/CF8L
IE450-7B	Bronze
IE450-7S	Stainless Steel CF8/CF8M/CF8L
IE450-12B	Bronze
IE450-12S	Stainless Steel CF8/CF8M/CF8L
IE225F-7B	Bronze
IE225F-7S	Stainless Steel CF8/CF8M/CF8L
IE450F-7B	Bronze
IE450F-7S	Stainless Steel CF8/CF8M/CF8L

NOTE:

- 1) Stainless Steel 304 (CF8) is standard supply. Stainless Steel 316 (CF8M) is optional supply.
- 2) Pick up tube - 2 meters long is standard supply.
- 3) When supplied as mounted on Mobile Foam Unit, the handle & pickup tube is not supplied. Pickup Hose is assembled on Mobile Unit.

DESCRIPTION

HD make Hand Held/ Portable Inline Inductors series IE225 and IE450 are designed primarily for use in the manual firefighting operation to provide a simple and reliable method of proportioning in constant flow applications. Each Inductor is designed for a pre-determined water pressure to give the correct proportioning at that pressure and discharge rate. Inductors are preset at flow and pressure as specified in Table-II.

The increase or decrease of the inlet pressure will result in an increase or decrease in the flow rate, which in turn will change the proportioning.

SPECIFICATION

The material of construction of portable inline inductor is corrosion resistant Stainless Steel or Bronze. The inductors have instantaneous couplings at inlet and outlet for easy and fast deployment in the field. A rugged handle is provided to relocate the inductor during operation. A clear transparent helix wire braided pickup tube of 1.5 meters long with Stainless steel dip tube is provided.

Inductors IE225 and IE450 are to be used with matching foam branch pipes BP225 and BP450. Improper selection of branch pipe will not give the desired performance. Mismatch of inductor and branch pipe will lead to either reduced throw or no induction. Refer table for proper matching of the Portable Inline Inductor and Foam Branch pipe, longer length can be used if care is taken to keep the hose in straight length & level between inductor & branch pipe.

It is recommended to use maximum 2 lengths - 15 meters of hose of 2.5" size for coupling to the inductor with branch pipe.

TABLE - II

Model	Inlet pressure kg/sq.cm	Flow lpm	Matching Foam Branch Pipe	Foam Concentrate	Approval
IE225-7B IE225-7S	7	225	BP225-4.2	AFFF 3%, AR-AFFF 3x3%	FM Approved
IE225-12B IE225-12S	12	225	BP225-7	AFFF 3%, AR-AFFF 3x3%	FM Approved
IE450-7B IE450-7S	7	450	BP450-4.2	AFFF 3%	FM Approved

LIMITED WARRANTY

HD FIRE PROTECT PVT. LTD. hereby referred to as HD FIRE warrants to the original purchaser of the fire protection products manufactured by HD FIRE and to any other person to whom such equipment is transferred, that such products will be free from defect in material and workmanship under normal use and care, for two (2) years from the date of shipment by HD FIRE. Products or Components supplied or used by HD FIRE, but manufactured by others, are warranted only to the extent of the manufacturer's warranty. No warranty is given for product or components which have been subject to misuse, improper installation, corrosion, unauthorized repair, alteration or un-maintained. HD FIRE shall not be responsible for system design errors or improper installation or inaccurate or incomplete information supplied by buyer or buyer's representatives. HD FIRE will repair or replace defective material free of charge, which is returned to our factory, transportation charge prepaid, provided after our inspection the material is found to have been defective at the time of initial shipment from our works. HD FIRE shall not be liable for any incidental or consequential loss, damage or expense arising directly or indirectly from the use of the product including damages for injury to person, damages to property and penalties resulting from any products and components manufactured by HD FIRE. HD FIRE shall not be liable for any damages or labour charges or expense in making repair or adjustment to the product. HD FIRE shall not be liable for any damages or charges sustained in the adaptation or use of its engineering data & services. In no event shall HD Fire's product liability exceed an amount equal to the sale price. The foregoing warranty is exclusive and in lieu of all other warranties and representation whether expressed, implied, oral or written, including but not limited to, any implied warranties or merchantability or fitness for a particular purpose. All such other warranties and representations are hereby cancelled.

NOTICE :

The equipment presented in this bulletin is to be installed in accordance with the latest publication standards of NFPA or other similar organisations and also with the provision of government codes or ordinances wherever applicable.

The information provided by us is to the best of our knowledge and belief, and consist of general guidelines only. Site handling and installation control is not in our scope. Hence we give no guarantee for result and take no liability for damages, loss or penalties whatsoever, resulting from our suggestion, information, recommendation or damages due to our product.

Product development is a continuous programme of HD FIRE PROTECT PVT. LTD. and hence the right to modify any specification without prior notice is reserved with the company.
